

Employee Attrition Analysis Report

1. Project Overview

This report provides insights into employee attrition patterns within an organization. Using Power BI, an interactive dashboard was developed to visualize key metrics related to attrition such as job satisfaction, department, job role, overtime, salary, promotion status, and distance from home. The objective is to identify trends and factors contributing to employee turnover to inform HR strategies.

2. Key KPIs

Metric	Value
Total Employees	1470
Total Attrition	237
Attrition Rate	16%
Average Job Satisfaction	2.73 / 4
Average Total Working Years	11.28
Average Years at Company	7.01
Average Years Since Last Promotion	2.19
Average Distance from Home	9.19

3. Attrition Analysis by Department

- Research & Development: 38.55% of attrition
- Sales: 35.59%
- Human Resources: 25.86%

Research & Development has the highest proportion of attrition cases.

4. Attrition Rate by Job Role

Job Role	Attrition Rate
Sales Representative	40%
Laboratory Technician	24%
Human Resources	23%
Sales Executive	17%
Research Scientist	16%
Manufacturing Director	7%
Healthcare Representative	7%
Manager	5%
Research Director	3%

5. Attrition by Job Satisfaction

Attrition was distributed across all levels of job satisfaction (1 to 4), with level 3 having the highest number of attrition cases.

6. Salary and Attrition

Employees who stayed had an average salary significantly higher than those who left. Indicates a correlation between lower pay and higher attrition.

7. Overtime and Attrition

Employees who worked overtime experienced higher attrition, signaling potential burnout or work-life imbalance.

8. Years Since Last Promotion

Most attrition occurred among employees who had not been promoted recently, with a sharp peak at 0 years and a gradual decline afterward.

9. Distance from Home

Attrition numbers are relatively high among employees living closer to the workplace, which might indicate that distance is not a primary factor influencing attrition in this case.

10. Working Years and Company Tenure

Most attrition occurs during the first 0–10 years of employment. There's a sharp drop in attrition after year 10.

11. Insights and Recommendations

Key Findings:

- Departments with higher technical demands show higher attrition.
- Job roles such as Sales Representative face the highest turnover.
- Low job satisfaction and salary are key attrition drivers.
- Overtime and lack of promotion correlate with increased attrition.

Recommendations:

- Increase retention strategies in Sales and R&D departments.
- Offer better compensation packages to lower-paid roles.
- Implement work-life balance initiatives to reduce overtime stress.
- Develop clear career progression paths to motivate employees.

12. Tools Used

Power BI: For interactive dashboards and visualizations.

Excel: For initial data handling and preprocessing.
